

	Role of Catheter Ablation vs Pharmacological Approaches in the Management of Atrial Fibrillation								
	High Risk Stable CAD Patients:How to Identify								
1:00-2:00	Blockbluster Trials of 2018	1:00-2:00	Case Based Discussion	1:00-2:00	Tropical Cardiology - Neglected Diseases	1:00-4:00	Post Graduate Teaching: Session IV	1:00-2:00	Oral Paper Presentation
	Top Trials in Interventional Cardiology		Stable coronary Artery Disease		Tubercular Pericardial Diseases		Bed side Evaluation of Acyanotic Congenital Heart Disease		
	Top Trials in Preventive Cardiology		45 year male presented with Stable Angina on Exertion class II from last 6 months. Non diabetic, BP 145/85, Lipid : LDL-164, HDL-32, TG-266.		Granulomatous Myocarditis in India: An Update		Case 3: Cyanotic CHD		
	Top Trials in Heart Failure		What further investigation and how to risk stratify		Takayasu Aortoarteritis – A Simplified Approach to Management		Case Presenter		
	Top Trials in Electrophysiology		Choice and Optimization of Pharmacotherapy		Kawasaki Disease				
			When to Perform Angiogram and How to Intervene		EMF – A Disease Heading to Extinction?		Mistakes to avoid in case presentation		
			Discussion and Audience Interaction		Discussion and Audience Interaction				
							Case 4: Miscellaneous		
			Acute MI				Case Presenter		
			45 year male presented with Chest Pain since 8 hours in non PCI capable hospital . ECG - STEMI Anterior wall				Spotters Exotica		
			How to Proceed?				Meet your examiner		
			When and How to Refer for Revascularization?						
			Rehabilitation						
			Discussion and Audience Interaction						
2:00-3:00	STEMI	2:00-3:00	LM & Bifurcation Symposia	2:00-3:00	Diet in Cardiology : Agree to Disagree			2:00-3:00	Oral Paper Presentation
	Choosing Thrombolytics in AMI: Review of the Evidence		LM with Multivessel Disease: Are PCI and CABG Equivalent		Carbohydrates: Are they the Main Culprit?				
	Choice of DAPT : Does it Matter?		Imaging for LM: The Optimal approach in Optimizing Outcomes		Oil for Indians: Which is the Best?				
	Late Presenters after AMI: When to Intervene?		Left Main Intervention. Tips and Ticks		Are Dairy Fats good for Heart?				
	Percutaneous Left Ventricular Assist Devices in Cardiogenic Shock		DK Crush, Culotte, SKS, T or TAP: Which is the Best Strategy		Egg consumption and CAD risk: Any Concerns Left?				
	Management of Arrhythmias in STEMI		Should Provisional Stenting Be Considered Even in Complex Bifurcations?		Saturated Fat : Friend or Foe?				
	Discussion and Audience Interaction		Discussion and Audience Interaction		Discussion and Audience Interaction				
3:00-4:00	Key Note Address	3:00-4:00	AF Conclace	3:00-4:00	Focused Session on Devices			3:00-4:00	Oral Paper Presentation
	Long term safety of Statin therapy : Perception versus Evidence.		Atrial fibrillation: Pathophysiology & Classification		The Leadless Pacemaker: Where Will it Fit in Practice?				

	Where does PCI stand today after COURAGE, FREEDOM & ORBITA.		The Value of 'Real World' Evidence for Assessment of Anticoagulation in Atrial Fibrillation		Subcutaneous ICD: The Story Thus Far				
	Secondary Prevention for RHD		Managing Heart Failure in Patients with Atrial Fibrillation		Wearable Implantable Defibrillator: Where Do they Bridge the Gap?				
	TBA		Monitoring for AF in Cryptogenic Stroke: Always Needed?		MRI Compatible devices: Do All My Patients Need It?				
	Discussion and Audience Interaction		Discussion and Audience Interaction		Non Functional Leads: Abandon or Retrieve				
					Discussion and Audience Interaction				
4:00--4.45	SCA: The Nuts and Bolts of Clinical Decision Making	4:00--4.45	Debate : Views and Counterviews	4:00--4.45	Do These Have Any Role in Primary Prevention?	4:00--4.45	Preventive Cardiology	4:00--4.45	Oral Paper Presentation
	Can the ECG help in Predicting Patients at Risk for SCA		Debate -1		Routine CT Angiogram		Fatty Acids and their role in Cardiometabolic Health		
	Assessing Risk for SCA in LV Dysfunction: Just EF or Should we Look Beyond				Routine Stress Test		Smoking and Metabolic Health		
	SCA Risk in HFmrEF and HFpEF: Underrecognized, Undertreated?		Pro		hsCRP		Why Doctors are More Worried than Excited over E-Cigarettes		
	ICD for SCA Prevention: Current Guidelines		Con		ACEI in Medium Risk Patients		What can we Learn from Failed Lifestyle Interventions?		
	Discussion and Audience Interaction		Rebuttal		Routine High Intensity Exercise		Is it in the genes? Genetic determination of exercise effects.		
			Rebuttal		Flax Seeds & Omega 3 Fatty Acids		Wine and CVD: Win or Whine		
			Debate -2				Discussion and Audience Interaction		
			Coronary Revascularisation provides no meaningful clinical benefit over Optimal						
			Pro						
			Con						
			Rebuttal						
			Rebuttal						
4.45-5.30	Key Note Address	4.45-5.30	Cases Which Foxed Me	4.45-5.30	Should We Write An Obituary For	4.45-5.30	Preventive Cardiology	4.45-5.30	Oral Paper Presentation
	Hypertension Targets in Recent Guidelines: What is supported by Evidence?		49 year old male with HCM with chronic AF on OAC, had past History of Ischemic Stroke. Presents with SAH		Stethoscope				
	PCI of Multi-Vessel Disease in Diabetics - Evidences and Uncertainties		Discussion and Audience Interaction		IABP				
			52 year old patient with RHD Moderate MR and AF. What would be the Appropriate Anticoagulant		BVS				
	Discussion and Audience Interaction		Discussion and Audience Interaction		Renal Denervation Therapy				
			52 year old female post prosthetic MVR 10 years back. Now presents with intermittent SOB, mild pedal edema, NYHA Class II. Echo shows normal prosthetic valve function, EF 60% and severe TR with normal RV function. How to proceed		Thrombosuction				
			Discussion and Audience Interaction		Beta Blockers in Hypertension
